

CommunityOS

Empower Your Community, Digitally.

The all-in-one platform for managing members, events, communications and welfare — built specifically for residential and cultural communities.

Member Management

Event Scheduling

Welfare Tracking

Custom Branding

Every Community Struggles With The Same Problems

Traditional community management is fragmented, manual, and time-consuming.

Member data is scattered

Contact lists in spreadsheets, dues tracked on paper, membership cards printed manually — there's no single source of truth.

Events are hard to coordinate

Organising events, tracking RSVPs, and publishing circulars still relies on WhatsApp groups and printed notices.

No digital presence

Prospective members can't find you online. Your community has no website, no gallery, and no announcement system.

Welfare goes untracked

Bereavement support, family visit records, and welfare disbursements are managed ad-hoc with no audit trail.

CommunityOS solves all of this — in one place.

A purpose-built platform giving your community a digital home, complete with member management, events, gallery, announcements, welfare tracking, and much more.

Everything Your Community Needs

12 integrated modules working seamlessly together on a single multi-tenant platform.

EXPORT OPTIONS

- PDF membership directory
- WhatsApp group message
- CSV data export
- Printable QR cards

Keep Your Community Engaged

Publish events, gallery albums, videos and pages — all with a single admin panel.

Events

- Create events with full description, venue, date and time
- Event types: General, Annual, Cultural, Sports
- Banner image with focal-point control
- Featured events pinned to homepage
- External registration URL support
- Published/draft workflow

Photo Gallery

- Organised into named albums with cover images
- Individual images with captions and display order
- Homepage carousel from selected images
- Published/private album control
- Optimised loading via CDN (Supabase Storage)

Video Library

- Embed YouTube or Vimeo videos
- Categorised archive of community recordings
- Featured video pinned to top
- Published/draft status control

Custom Pages

- Create unlimited pages with custom slugs
- Rich content: headings, text, images, links
- SEO meta title and description per page
- Appears in site navigation automatically

Circulars

- Publish notices and official circulars
- PDF attachment support
- Date-stamped archive for members
- Feature flag: enable or disable per community

Stay Connected With Your Community

Real-time announcements, an interactive members map, and local sponsor integration.

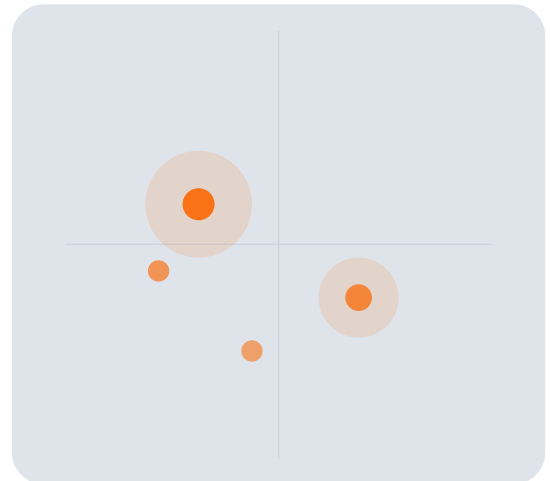

Announcements

- Priority levels: Urgent, High, Normal, Low — each with distinct colours
- Scrolling ticker bar at the top of the site for live alerts
- Schedule with start date and automatic expiry date
- Dedicated /announcements page showing all active notices
- Admin dashboard to create and manage all announcements

Community Sponsors

- Showcase local businesses that support the community
- Logo, tagline, address and Google Maps link
- Auto-rotating sponsor ticker bar on public site
- Latitude/longitude for map pin display
- Display order control for premium placement

Members Map

- Interactive Leaflet map showing all member locations
- Clustered pins for dense areas — zooms to reveal individuals
- Hover to reverse-geocode and show locality name
- Respects member privacy — shows approximate area

Go Beyond Digital — Support Your Members

Purpose-built modules for the welfare functions that define a caring community.

Bereavement Management

- Log bereavement notices for members and their families
- Record relation to member (self, spouse, parent, child, sibling)
- Schedule services: cremation, 3rd day, 9th day, 40th day, sradham
- Track welfare amount disbursed and payment date
- Attendance tracking for community members who attended
- Notes and internal remarks field

Family Visit Tracking

- Record official visits to member families
- Visit types: Annual, Welcome, Illness, Condolence, Other
- Date, purpose, and outcome documentation
- Track which committee members participated
- Full visit history per member family

Welfare Scheme Management

Create named welfare schemes with eligibility rules

Generate unique application links for each scheme

Members can apply via a public form — no login required

Admin reviews applications and sends approval/rejection emails

Track link views and conversion analytics

Structured welfare disbursement

Fully In Your Control

A powerful admin panel gives your committee complete control — no developer needed.

Admin Dashboard

- Live stats: member count, active members, upcoming events
- Recent activity feed across all modules
- Quick-action shortcuts to common tasks
- Role-based access: Tenant Admin, Member roles

Navigation Editor

- Drag-and-drop menu management
- Discover, Connect, and Services menu sections
- Enable or disable individual links per feature
- Seed built-in links or add custom ones

Security

- Row-Level Security (RLS) on all database tables
- Data fully isolated per community — zero cross-tenant access
- Supabase Auth with email + password
- Registration-time fraud detection (4 signal types)

Custom Branding

Primary Colour

Your community's brand colour

Secondary Colour

Accent and highlight colour

Logo & Favicon

Upload your own PNG/SVG

Font Theme

8 typography pairs available

Colour Theme

Pre-built theme presets

Header & Footer

Custom background colours

Custom Domain

- Map your own domain (e.g., kvms.org) to your community site
- Automatic SSL via Vercel
- Available on Pro and Community plans

Platform Admin Portal

A super-admin dashboard for the CommunityOS team to monitor all registered communities, manage trial periods, review fraud flags, and view platform-wide analytics — all separate from tenant data.
